ELIGIBILITY

EU citizen. Eligible to work in Ireland; no sponsorship required.

TECHNICAL SKILLS

Flutter / Dart

NestJS / Node.js

Rust

C# / .NET

Python

TypeScript / JavaScript

TOOLS & PLATFORMS

MCP servers

Unity

AWS

GitLab CI

Docker

Java

CircleCI

OpenGL

Git

LANGUAGES

Hungarian

Native

English

Proficient

German

Independent

INTERESTS

Low-level & graphics code

Game development

Volleyball

AVAILABILITY

Available for full-time roles from September 2027, after completing my MSc at Trinity College Dublin.

PROFILE

Software developer and MSc Computer Science student at Trinity College Dublin (expected September 2027), focused on mobile, full-stack, and low-level systems. Experience with C#/.NET enterprise software, automated testing, Flutter/NestJS applications, and Rust.

WORK EXPERIENCE

- One Identity Hungary · May 2025 – Present
- Software Developer
- Budapest, Hungary · Started as Software Tester
- Develop on a C#/.NET enterprise codebase for Active Directory and Microsoft Entra ID products; serve as an R&D escalation point for customer support.
 - Built automated test suites for Windows applications and performed quality assurance (QA) across web, console, and single sign-on (SSO/RSTS) components.
 - Configure GitHub Copilot context, skills, and Model Context Protocol (MCP) servers.

SELECTED PROJECTS

- Aug 2023 – Present
- Lumina Thesis – 2D game engine in Rust & OpenGL
- Designed the engine/game architecture with a custom entity-component system (ECS) and a multithreaded logic/render split; cross-compile to desktop and Android.
 - Wrote a custom OpenGL / GLSL 450 renderer with tessellation shaders, 16x MSAA, and a full-screen post-processing pass (god rays, vignette, focal blur).
- Jul 2025 – Present
- KeepYourHabits Co-founder – habit-tracking mobile app – Flutter, NestJS, AWS, Docker, CI/CD
- Co-architected a Flutter client and NestJS backend on Amazon Web Services (AWS).
 - Containerised services with Docker and automated continuous integration and delivery (CI/CD); focused the MVP on core habit-tracking flows.
- Apr 2024 – Nov 2024
- Touch Co-founder – digital business-card app – Flutter, NestJS, Swift, CircleCI, AWS
- Built at a university innovation lab; implemented iOS-native features in Swift: NFC scanning, PKPass creation, and Apple ID authentication.
 - Automated App Store / Play Store deployment with CircleCI; helped migrate the backend from Laravel (PHP) to NestJS (Node.js).
- Feb 2025 – May 2025
- Wild Trails University team – 3D tycoon park simulation in Unity, C#
- Designed a procedural terrain system using noise algorithms; implemented save/load for complex game state.
 - Built placement algorithms for road networks and lakes; set up the GitLab CI pipeline.

EDUCATION

- Sep 2026 – Sep 2027 (expected)
- MSc Computer Science – Augmented & Virtual Reality
- Trinity College Dublin, Ireland
- Jul 2023 – Jun 2026
- BSc Computer Science
- Eötvös Loránd University (ELTE), Faculty of Informatics, Budapest, Hungary
- Sep 2025 – Jan 2026
- Erasmus+ Exchange – Informatics Engineering
- Universitat Politècnica de València (ETSINF), Spain
- Coursework: Network Information Security Technologies, Computer Architecture
