Proficient

German

Independent

INTERESTS

Low-level & graphics code

Game development

Volleyball

AVAILABILITY

Based in **Dublin, Ireland**. Available for **full-time roles from September 2027**, on completion of my TCD MSc.

PROFILE

Computer Science MSc student and working software developer across **mobile, full-stack, and low-level** engineering. Have shipped Flutter/NestJS apps, co-founded two startups, and currently integrate LLM tooling into a C#/.NET enterprise codebase. Seeking a **software engineering role in Ireland** where I can own features end-to-end and grow in a strong engineering culture.

EXPERIENCE

- May 2025 – Present
- Software Developer** *Started as Software Tester – One Identity Hungary – Budapest, Hungary*
- Integrated GitHub Copilot and internal AI tooling by setting up **MCP servers**, bridging LLMs with the local C#/.NET dev environment for Active Directory and Entra ID products.
 - Engineered developer personas and standardised context access to streamline day-to-day .NET Framework work.
 - R&D escalation point for customer support; previously built automated test suites for Windows apps and ran manual QA across web, console, and SSO (RSTS) components.

SELECTED PROJECTS

- Aug 2023 – Present
- Lumina** *Thesis – 2D game engine in Rust & OpenGL*
- Designed a clean engine/game architecture with a custom **ECS** and a **multithreaded logic/render split**; cross-compiles to desktop and Android.
 - Wrote a custom **OpenGL / GLSL 450** renderer with tessellation shaders, 16× MSAA, and a full-screen **post-processing** pass (god rays, vignette, focal blur).
- Jul 2025 – Present
- KeepYourHabits** *Co-founder – habit-tracking mobile app – Flutter, NestJS, AWS, Docker, CI/CD*
- Architected the system end-to-end: Flutter client, NestJS backend services, and cloud deployment.
 - Containerised services with Docker and automated CI/CD workflows for repeatable deployment; narrowed the MVP around core habit-tracking flows.
- Apr 2024 – Nov 2024
- Touch** *Co-founder – digital business-card app – Flutter, NestJS, Swift, CircleCI, AWS*
- Built at a university innovation lab; implemented iOS-native features in Swift: **NFC scanning, PKPass creation, and Apple ID authentication**.
 - Automated App Store / Play Store deployment with CircleCI; helped migrate the backend from Laravel (PHP) to NestJS (Node.js).
- Feb 2025 – May 2025
- Wild Trails** *University team – 3D tycoon park simulation in Unity, C#*
- Designed a procedural terrain system using noise algorithms; implemented save/load for complex game state.
 - Built placement algorithms for road networks and lakes; set up the GitLab CI pipeline.

EDUCATION

- Sep 2026 – Sep 2027 (expected)
- MSc Computer Science – Augmented & Virtual Reality**
- Trinity College Dublin, Ireland
- Jul 2023 – Jun 2026
- BSc Computer Science**
- Eötvös Loránd University (ELTE), Faculty of Informatics, Budapest, Hungary
- Sep 2025 – Jan 2026
- Erasmus+ Exchange – Informatics Engineering**
- Universitat Politècnica de València (ETSINF), Spain
- Coursework: Network Information Security Technologies, Computer Architecture*
