ELIGIBILITY

EU citizen. Eligible to work in Ireland; no sponsorship required.

TOP SKILLS

Python
NestJS / Node.js
TypeScript / JS
Rust
C# / .NET
Flutter / Dart

ENGINEERING TOOLING

Docker AWS CI/CD
GitLab CI CircleCI Git
MCP servers OpenGL Unity

LANGUAGES

Hungarian Native NAT
English Proficient C1
German Independent B2

INTERESTS

Low-level & graphics code
Game development
Volleyball

AVAILABILITY

Relocating to Dublin in Sep 2026.
Available 15–20 hours/week
alongside a full-time TCD MSc.

PROFILE

Software developer with commercial experience integrating **AI tooling** into an enterprise C#/.NET codebase and end-to-end ownership of NestJS, Docker, AWS, and CI/CD infrastructure. Drawn to **backend and infrastructure** work: debugging failures, writing readable, reliable code, and taking bounded features from design through deployment.

EXPERIENCE

- May 2025 – Present
Software Developer One Identity Hungary – Budapest – *started as Software Tester*
- Integrated GitHub Copilot and internal AI tooling by setting up **MCP servers**, bridging LLMs with the local C#/.NET dev environment for Active Directory and Entra ID products.
 - Engineered developer personas and standardised context access to streamline day-to-day .NET Framework work.
 - R&D escalation point for customer support; previously built automated test suites for Windows apps and ran manual QA across web, console, and SSO (RSTS) components.

SELECTED PROJECTS

- Aug 2023 – Present
Lumina Thesis – game engine in **Rust & OpenGL**
- Built from scratch: rendering pipeline, ECS-style game architecture, and data-driven performance work.
 - Cross-platform compilation targeting desktop and mobile; hands-on understanding of low-level system interactions.
- Jul 2025 – Present
KeepYourHabits Co-founder – habit-tracking mobile app – **Flutter, NestJS, AWS, Docker, CI/CD**
- Architected the system end-to-end: Flutter client, NestJS backend services, and cloud deployment.
 - Containerised services with Docker and configured AWS and CI/CD infrastructure; narrowed the MVP around core habit-tracking flows.
- Apr 2024 – Nov 2024
Touch Co-founder – digital business-card app – **Flutter, NestJS, Swift, CircleCI, AWS**
- Built at a university innovation lab; implemented iOS-native features in Swift: **NFC scanning, PKPass creation, and Apple ID authentication**.
 - Automated App Store / Play Store deployment with CircleCI; helped migrate the backend from Laravel (PHP) to NestJS (Node.js).
- Feb – May 2025
Wild Trails University team – 3D tycoon park simulation in **Unity, C#**
- Designed a procedural terrain system using noise algorithms; implemented save/load for complex game state.
 - Built placement algorithms for road networks and lakes; set up the GitLab CI pipeline.

EDUCATION

- Starting Sep 2026
MSc Computer Science – Augmented & Virtual Reality
Trinity College Dublin, Ireland
Conditional offer accepted; pending BSc completion
- Jul 2023 – Jun 2026
BSc Computer Science
Eötvös Loránd University (ELTE), Faculty of Informatics, Budapest
Final year – expected completion Jun 2026
- Sep 2025 – Jan 2026
Erasmus+ Exchange – Informatics Engineering
Universitat Politècnica de València (ETSINF), Spain
Coursework: Network Information Security Technologies, Computer Architecture
