ELIGIBILITY

EU citizen. Eligible to work in Ireland; no sponsorship required.

TOP SKILLS

Flutter / Dart
NestJS / Node.js
Rust
C# / .NET
Python
TypeScript / JS

ALSO SKILLED IN

MCP servers Unity AWS
GitLab CI Docker Java
CircleCI OpenGL Git

LANGUAGES

Hungarian Native NAT
English Proficient C1
German Independent B2

INTERESTS

Low-level & graphics code
Game development
Volleyball

AVAILABILITY

Based in Dublin, Ireland. Available for full-time roles from September 2027, on completion of my TCD MSc.

PROFILE

Computer Science MSc student at Trinity College Dublin and working software developer across mobile, full-stack, and low-level engineering. Have built and deployed Flutter/NestJS apps, co-founded two early-stage startups, and now develop on a C#/.NET enterprise codebase, using agentic AI tooling day-to-day. Seeking a software engineering role in Ireland where I can own features end-to-end and grow in a strong engineering culture.

EXPERIENCE

- May 2025 – Present
Software Developer Started as Software Tester – One Identity Hungary – Budapest, Hungary
- Leverage agentic AI tooling in daily development – set up MCPs and configure GitHub Copilot context and skills so the agent works directly against the local C#/.NET codebase – to speed up routine work on Active Directory and Entra ID products.
 - R&D escalation point for customer support; previously built automated test suites for Windows apps and ran manual QA across web, console, and SSO (RSTS) components.

SELECTED PROJECTS

- Aug 2023 – Present
Lumina Thesis – 2D game engine in Rust & OpenGL
- Designed a clean engine/game architecture with a custom ECS and a multithreaded logic/render split; cross-compile to desktop and Android.
 - Wrote a custom OpenGL / GLSL 450 renderer with tessellation shaders, 16x MSAA, and a full-screen post-processing pass (god rays, vignette, focal blur).
- Jul 2025 – Present
KeepYourHabits Co-founder – habit-tracking mobile app – Flutter, NestJS, AWS, Docker, CI/CD
- Co-architected the system: Flutter client, NestJS backend services, and cloud deployment.
 - Containerised services with Docker and automated CI/CD workflows for repeatable deployment; narrowed the MVP around core habit-tracking flows.
- Apr 2024 – Nov 2024
Touch Co-founder – digital business-card app – Flutter, NestJS, Swift, CircleCI, AWS
- Built at a university innovation lab; implemented iOS-native features in Swift: NFC scanning, PKPass creation, and Apple ID authentication.
 - Automated App Store / Play Store deployment with CircleCI; helped migrate the backend from Laravel (PHP) to NestJS (Node.js).
- Feb 2025 – May 2025
Wild Trails University team – 3D tycoon park simulation in Unity, C#
- Designed a procedural terrain system using noise algorithms; implemented save/load for complex game state.
 - Built placement algorithms for road networks and lakes; set up the GitLab CI pipeline.

EDUCATION

- Sep 2026 – Sep 2027 (expected)
MSc Computer Science – Augmented & Virtual Reality
Trinity College Dublin, Ireland
- Jul 2023 – Jun 2026
BSc Computer Science
Eötvös Loránd University (ELTE), Faculty of Informatics, Budapest, Hungary
- Sep 2025 – Jan 2026
Erasmus+ Exchange – Informatics Engineering
Universitat Politècnica de València (ETSINF), Spain
Coursework: Network Information Security Technologies, Computer Architecture
